THE ERUDITE ADVANTAGE

PERSONALIZED ATTENTION

- Assessment of aspirants' strengths and weaknesses
- Charting out study schedule based on background, performance, need etc.
- Performance evaluation at every step of preparation
- **One-to-one** mentoring to ensure improvement
- Sessions on Institute selection and application
- Stress buster sessions with individual feedback
- Individual **doubt clearing** sessions
- Group activities to develop clearer understanding of concepts

BEST CLASSROOM TRAINING

- Specialized faculty for all sections from IIMs, XLRI and IITs
- Refresher classes to help build fundamentals
- Micro sessions to identify areas of difficulty
- Classes on advance concepts covering difficult areas of CAT
- Unique shortcut techniques with special focus on Vedic Mathematics
- Revision classes for better retention of topics covered earlier
- Special sessions covering all the sections of XAT, IIFT and other MBA entrance exams

ONLINE SUPPORT

- 500+ Online Topic tests to understand strengths and weaknesses
- 100+ Online Sectional tests aimed at integrating learning
- 100+ General Knowledge Tests
- 10+ Online Strategy Tests
- 12 Actual Online CAT papers for evaluation
- 20 All India Online Mock CATs with performance analysis with detailed solutions
- Computerized composite and sectional score analysis and evaluation sessions
- Specialized software support to map individual learning curves of all students

COURSE MATERIALS

- Comprehensive set of **self study** reference modules to cover fundamental concepts
- A complete and comprehensive book series on All You Need to know about : DI - Vocabulary - Algebra - Geometry - Arithmetic - Higher Maths - Number System - Logical Reasoning - RC - Grammar - Verbal Ability
- These contain questions from basic to advanced level with solved examples & practice exercises
- All the course material provided is in keeping with the latest trends and patterns of various Tests
- Dedicated R&D team for updated course material

SPECIAL FEATURES

- Online All India SIM CATs with detailed analysis
- Actual CAT papers with detailed discussion
- Sectional tests to improve sectional performance
- Tests to enhance crisis management skills
- Special classes and practice tests for XAT, IIFT, SNAP etc
- Focused GD / WAT / PI sessions to ensure holistic skill development
- Indispensable self analysis Introspectrum specially designed to Map progress of a student

OMET
(Other Management Entrance Tests)

- Special classroom sessions covering various sections of XAT, IIFT, SNAP and OMETs
- Individual guidance and pattern discussion on various entrance exams
- Study plan for XAT, IIFT, SNAP and OMETs.
- Special classroom sessions covering various areas of General Awareness
- Total 15 Mock Tests covering XAT, IIFT, SNAP, CMAT, NMAT etc
- Discussion on actual papers of various MBA entrance tests

Short cut Techniques for every topic in Maths to improve both speed and accuracy

Definite methods to improve calculations & exposure to different types of graphs for D.I.

Innovative proactive techniques to crack usage based questions and improve scores in R.C. / V.A.

Innovative methodology to tackle different types of questions in L.R.

Individual Doubt Clearing Sessions to provide personalized attention

Home Assignments to ensure students grasp concepts properly, Mental Exercises to instill the importance of speed

Follow up on doubts and introduction of new concepts to ensure balanced learning through Micro Sessions

Sectional tests in different areas to integrate learning

Teaching of more refined concepts using the earlier modules as a base

Simulated Online CATs including tests based on actual CAT pattern to gauge the preparation level of students

Strategy to help plan individual approach to the paper

Computerized Score Analysis to check relative strength and weaknesses

Discussion on the Sim CATs to demonstrate application of short cuts and time saving techniques

Individual counselling by IIM Alumni to refine strategy

Institute counselling which helps in selecting the right institute

Study groups for enhanced clarity of concepts and confidence with difficult topics

Making a perfect strategy, based on strength and weaknesses

The CAT Day

QUANTITATIVE APTITUDE

Quantitative Aptitude is the test of numerical, logical and mathematical knowledge. CAT tests your IQ level through this section. The concepts of number system, geometry, mensuration, algebra, function and arithmetic constitute the major part of this section.

YOU NEED

- Strong command over the basic theorems and properties of topics

- Different approaches to solve problems

- Novel approach to solve geometry and mensuration problems

- Mental math skills to solve problems faster

- To work with options

- To identify topics as per your strengths and weaknesses to optimize scores

- Out of the box thinking

- To connect different concepts in a question

- To develop a combination of speed and accuracy in solving problems

WE PROVIDE

- **Basic classes** — to help develop and consolidate concepts for students from diverse backgrounds

- Regular classes focusing on solving problems by applying shortcut methods

- **Workshops** on **frequently asked topics** in CAT like Number Systems, Geometry, etc. with each topic divided into 2 - 4 classes for thorough coverage of related formulae and concepts

- Strategy to handle different types of questions
  - Formula based
  - Reasoning or Logic based
  - Miscellaneous, involving a combination of multiple concepts
  - Innovative questions

- Unique time saving techniques for specific topics

- Exhaustive practice through class assignments, home assignments and model tests

VERBAL ABILITY

This section includes Reading Comprehension and English Usage. It aims at measuring the proficiency of students in English language with a clear focus on logical thinking.

It tests the structural knowledge of the language, vocabulary and reading skills. Passages cover diverse areas and the question types vary from factual to contextual to inferential.
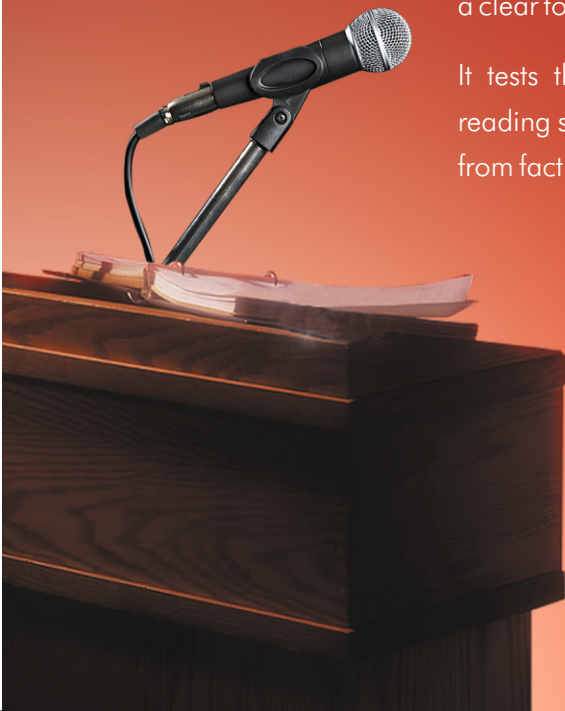

YOU NEED

- Functional knowledge of the language

- A sound basis of English grammar that includes the knowledge of the rules of standard written English

- Knowledge and correct usage of words

- Active Reading of Passages

- High concentration, retention and recalling ability

- Enhanced Speed

- Active Vocabulary usage

- Recognition of Question Types

- Application of roots, prefixes and suffixes

- Accurate Analysis and Decision Making

WE PROVIDE

- A thoroughly researched and updated hotlist of the most frequently encountered words in CAT

- Techniques to identify and correct grammatical errors in less than **30 seconds**

- **Flash card technique** and **C.O.W.** - Powerful tools to acquire a distinctive vocabulary of more than **2000** words in less than 3 months

- Passages designed to help students read actively as opposed to passive reading

- **4 easy steps** to double concentration and perfect recollection

- **Mind Mapping, Skimming** and **Scanning** - excellent methods to deal with lengthy and difficult passages

- Innovative methods like **P.O.E.** and **L.R.L.** to tackle tricky structural questions on Jumbled Sentences

DATA INTERPRETATION

Data Interpretation consists of graphs, both calculation and logic based. The mode of representing data varies from traditional Bar graphs, Pie Chart etc. to more innovative forms. The entire section thoroughly tests one's analytical & logical skills apart from speed and accuracy.
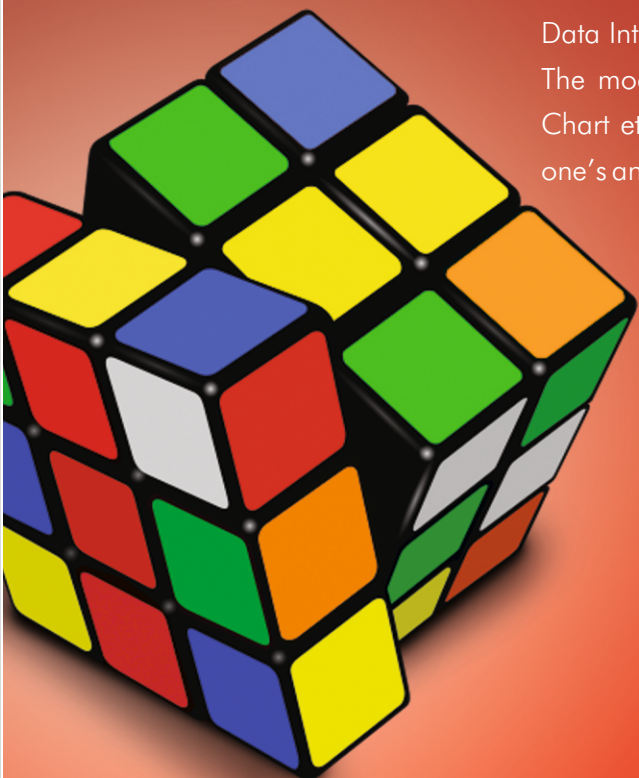

YOU NEED

- To understand graphs

- To interpret and analyze data

- To analyze and organize abstract data

- To scan data and get relevant information out of it

- To develop speed in calculation

- To use the law of approximation in calculations

- Application of concepts to different question types

- Exposure to various types of data representation

- To know how to handle data sufficiency

- Logic driven data interpretation questions

- Calculation driven data interpretation questions

WE PROVIDE

- Beat the calculator:

96^2	$\frac{48}{90}$	51 x 81
39 x 47	$\frac{81}{111}$	$\sqrt{189762}$
$\frac{237}{489}$	11 x 432	25 x 144

  Learn to do **each** of the above calculations and more, in **less than 5 seconds** through a combination of Vedic Maths and in-house developed methods

- Unique approach to solve each of the **6 different types** of graphs - Line graphs, Bar graphs, Pie charts, Tabular data, Combo graphs, Innovative graphs

- **Strategies to select** the right type of questions and graphs, solve questions with options, deal with close options, solve data sufficiency problems

- **Index of terminology** associated with graphs like EMI, interest rates, market capitalization etc. for better understanding of graphs

- Ample number of solved examples highlighting concepts and ideas

LOGICAL REASONING

Logical Reasoning questions are essentially puzzles. They test your logical thinking ability. The section also tests your ability to visualize the problems, as well as coherence in the flow of ideas.

As a section, Logical Reasoning is skill based and practise can help you maximize your scores here.

YOU NEED

- To understand different kinds of logical reasoning questions

- To develop approaches to solve different question types

- The ability to find the connection between different parts of data

- To get the relevant information out of big data sets

- Deductive and Inductive reasoning

- To develop an out of the box thinking ability

- To assess and arrange the multitude of information

- To focus on keywords' analysis

- Smart studying strategies

WE PROVIDE

- Unique approach to solve the different kinds of logical reasoning problems- Syllogisms, family tree, network diagrams, puzzles & teasers, sports & games

- Strategies to select the right kind of questions, solve questions with concepts and using answer options

- Ample number of solved examples highlighting concepts and ideas

- Class assignments with various question types on each topic to give a wide range of exposure

- Multiple approaches to problem solving

- Skills to organize the info in a schematic manner

- Strategies to filter out the unwanted info and select the important parts

STUDENTS' SPEAK

The kind of classroom training and the Individual Attention I got at Erudite helped me in achieving my dream of getting calls from the best B-schools of India . The friendly classroom atmosphere, unlimited 1 to 1 doubt clearing sessions, Exhaustive Workshops, and the peer group I studied with contributed to my success. The concepts of the Top 50 Batch and the Micro Sessions were unique tools which helped me to prepare better. Thank you Erudite!
Vishal Kedia (100 percentile), IIM A,B,C,L,I,K,R

The methodical approach, backed with excellent study materials, co-operative faculty members and their full time devotion towards each and every student have helped me to build my knowledge and hone my skills. The entire course module was at par with the CAT standard which helped me to crack the toughest nut.
Ankur Kanoria (99.84 percentile), IIM A,B,C,L,I,K

The Test series & stimulating GDPI training sessions at Erudite has surpassed my expectations. The All India simulated CAT tests and detailed analysis by the faculty members helped me to optimize scores. The entire training has been exhaustive and challenging.
Mayank Pradeep Tibrewal (99.98 percentile), IIM A,B,C,L,K

Excellent contact hours training at Erudite has transformed me from better to Best. Study materials are really helpful and they commensurate with the CAT standard. Erudite's most advantageous part is their faculty members; they are simply the BEST and are always accessible. The quality of the SIM CATs is also quite good, and the projected percentile given by Erudite was very accurate.
Shantanu Ghosh (99.89 percentile), IIM A,B,C,L,I,K

The systematic training module and Personalized Guidance at every step are the two most important aspects of CAT training. Erudite has a perfect combination of both. I could not have made a better decision than to join the classroom training at Erudite. Its a GREAT feeling as a student. It's Simple...... YOU NEED THE BEST TO GET THE BEST.
Ameetosri Basu (99.68 percentile), IIM A,B,C,K, I, S
